20 years in critical infrastructure

4 regions in the global rotation

8 PB migrated and configured on Azure

+38 cloud projects delivered

SUMMARY

Twenty years keeping critical infrastructure standing: today in Nutanix's global team, across four regions and in English; before that as a cloud architect, with 8 PB migrated and more than 38 projects delivered on Azure. My original training is offensive — EC-Council certified ethical hacker—: I design high availability knowing exactly where it breaks.

CORE COMPETENCIES

Reliability: Site Reliability Engineering, high availability HA, DRP, BCP, business continuity, disaster recovery, data protection, incident management, root cause analysis, performance analysis

Virtualisation: Nutanix AHV, Nutanix Leap, VMware, Microsoft Hyper-V, Citrix

Cloud: Microsoft Azure, IaaS, cloud architecture, Lift & Shift migration, petabyte-scale storage

Security: Ethical hacking, penetration testing, secure architecture, Linux hardening, firewalls, AAA and AAA+, Novell Identity Manager, eDirectory, Sentinel

Languages: Spanish native · English professional, in daily use across a four-region team

EXPERIENCE

Site Reliability Engineer — Aug 2019 – Present

Nutanix Mexico, S.A. de C.V. · Mexico City

- Production support for hyperconverged infrastructure within Nutanix's global team, in English and across four regions.
- Troubleshooting and root cause analysis across Nutanix AHV, VMware, Microsoft Hyper-V and Citrix; performance virtual team.
- Internal trainer for performance troubleshooting: I teach other engineers the method, not just close the case.
- HA, DRP and BCP architectures; disaster recovery, cloud incident response on Nutanix Leap and Azure, and Linux hardening.

IT Solutions Architect — Open Source and Security — Apr 2018 – Aug 2019

bSide · Microsoft Gold Partner · Mexico City

- More than 38 enterprise and government projects delivered on Microsoft Azure, including Pemex, IMSS and Actica.
- Lift & Shift virtual machine migration with 8 PB of storage migrated and configured.
- Design, build and implementation of cloud architecture; Azure IaaS and on-premise operation.
- Secure architecture assessment and penetration testing; HA, DRP and BCP architectures.

Specialized Security Engineer (Class 3) — Dec 2013 – Apr 2018

Grupo Elektra, S.A. de C.V. · Information Security Office · Mexico City

- Ethical hacking across the systems of a financial and retail group, from its Information Security Office.
- Security certification of applications and operating systems before production release.
- Novell Identity Manager, eDirectory and Sentinel; high-transaction AAA and AAA+ servers.
- Secure architecture analysis, incident response and Linux and firewall hardening on HA architectures.

CERTIFICATIONS

CEH — Certified Ethical Hacker — EC-Council · 2018

NCP, NCAP and NSS — Nutanix

EDUCATION

MBA — Management and Business Administration Universidad del Valle de México · U. Europea de Madrid — 2013 – 2015

B.Eng. in Computer Systems Engineering Universidad del Valle de México — 2008 – 2013

Technician in Microcomputer Operation — 2006 – 2008
